

old growth douglas fir – gym bleacher

Tables & counters made from old growth gym bleachers reclaimed from West Coast gymnasium/stadium deconstruction.

Bleacher table with original seat numbers.

Bleacher counters with clean face.

We reclaim and manufacture locally on the West Coast, so we see all sorts of amazing douglas fir while we are in the field. Abandoned warehouses, decrepit docks, and creaky old gymnasiums get our creative juices flowing because they're full of wooden treasures. We partner with several construction companies to make sure that wood from decommissioned buildings gets a new life in one of our products.

Reclaimed from gymnasiums being renovated, this wonderful wood is literally in a class by itself. Even when these bleachers were installed they were special, as it required the highest grade of exclusively old growth lumber to meet the structural demands and long lengths of bleachers. You simply will not find clear fir with such tight grain fir anywhere else and new lumber cannot begin to compare! This material comes with random bolt holes hinting at its past life...you can leave them as-is or we can fill them with matching wood dowels. It can be milled for a clean look or for something really different use the original face, complete with seat numbers and angst filled-teen graffiti (you have been warned!)

fast facts: old growth douglas fir – gym bleacher

old growth douglas fir – gym bleacher

table & counter specification

description

Classic douglas fir with exceptionally tight vertical grain and an occasional filled bolt holes. This product is highly customizable, please call with your project ideas and we will make them a reality.

source

Old growth gym bleachers reclaimed from West Coast gymnasium/stadium deconstruction.

dimensions

Thickness: ¾" Max Width 48" Max Length 12'

Additional support may be needed due to ¾" thickness, call us for assistance on your specific application.

species

Pseudotsuga menziesii

hardness

660-710 (Janka scale).

character

Knot free, very tight vertical grain with variable ¾" bolt holes from the wood's prior use. May also contain heartwood and sapwood and very minor pitch pockets. Rich honey color that subtly darkens over time. This natural process, called patina, will add to the beauty and character of your wood. Original bleacher face contains the original varnish, seat numbers, and angst-filled teen graffiti (you have been warned!)

finish

Factory applied multi-coat, low VOC Polyurethane.

shipping

All material is FOB Portland.
We can coordinate local or national delivery.
Estimated ship weight: 2¾ pounds per square foot (standard ¾" thickness)

installation

Store, handle and install per Architectural Woodwork Standards (AWS).

LEED

MR 3: Materials Reuse, MR 4: Recycled Content, MR 7: Certified Wood

Certified recycled 100% (post consumer reclaimed) by Forest Stewardship Council (FSC). Cert No SW-COC-001962.
